ABOUT ME

I recently graduated with a degree in **computer science**, specializing in **game development**. While my education provided a strong foundation in programming, my true passion lies in **the artistic side of the game industry**. I specialize in **concept art** and **storyboarding**, as well as creating immersive **environments** that transform ideas into engaging narratives and enhance player experiences, all while mastering **digital art** techniques to create compelling and innovative designs.

ACADEMIC EXPERIENCE

AR (Augmented Reality) applications

AR furniture 2022-2023

An augmented reality app that allows users to place and customize furniture in real-world spaces, creating virtual layouts with real-time interaction.

- 3D Modeling (Blender)
- Game Development (Unity (Vuforia)
- Backend Development(NodeJS, MongoDB)
- Version Control (Github)

AR Game of Thrones 2022-2023

A mobile game inspired by Game of Thrones that features straightforward gameplay and engaging quizzes set in the rich world of Westeros.

- 3D Modeling (Blender)
- Game Development (Unity (Vuforia)
- Backend Development(NodeJS, MongoDB)
- Deployment (Vercel)
- Version Control (Github)

Desktop games

AXE 2021-2022

A first-person survival game where players build and craft items to escape monsters. Gather resources, construct shelters, and team up in multiplayer modes for an engaging and thrilling experience

- 3D Modeling (Maya)
- Game Development / Environment Art (Unity)
- Backend Development(NodeJS, MongoDB)
- Networking(Mirror)
- Version Control (Github)

WORK EXPERIENCE

Game developer intern 05/01/2024-05/07/2024
Craxis Agency

VR (Virtual Reality) Experience

INDAR VR Furniture Experience

A virtual reality experience on the Meta Quest 2 that provides furniture suppliers and customers with a customizable showroom showcasing modern and Tunisian furniture. Users can interact with various pieces and arrange layouts.

- 3D Modeling (Blender)
- Game Development / Environment Art (Unreal Engine 5)
- Backend Development(NodeJS, MongoDB)
- Deployment (Vercel)
- Version Control (Github)
